Add Apps to your Email!

Bring new functionality and spice to your emails and let your recipients interact with you in a new exciting way.

WiseStamp Email Apps enable users to transform their emails into a powerful self expression and promotional tool.

For users – Email Apps enable you to easily customize your email signatures with your personal social profiles and allows you to add to each outgoing email dynamic content such as your latest eBay item, recent blog post, your latest tweet or a cause to promote. The recipients of your email will see the updated content of the Email App and will be able to also interact with it directly from the email (e.g. retweet or follow in the Twitter App or buy in the eBay App).

For partners – WiseStamp Email Apps Platform enables social services, brands and publishers to distribute their content via Email Apps in one of the biggest online markets – email.

Email Apps enable publishers to enjoy an effective distribution channel as well as the ability to constantly engage users with their own brand and content beyond the boundaries of their websites. Email Apps are a powerful engagement and user retention tool.

- WiseStamp reached over 1 million installs on August, 2010.
